Arguably best decking system available
with two patented innovations

“Great things are done by a series
of small things brought together”

Vincent Van Gogh

INTRODUCTION

Our Company, **Yvyra**, manufactures indoor and outdoor wood floors for 45 years with a firm commitment to:

quality
reliability
innovation

Our floors have been embraced in all kinds of projects in more than 60 countries worldwide, featuring collaborations with internationally known architects such as Frank Gehry, Jean Nouvel, Santiago Calatrava and Norman Foster.

R+D+I **tradition** **experience** **know-how**

Stimulates us to improve our products and find better solutions to be one step ahead

1995 - We invented and patented the first hidden fastening system clip for decks, named **Exterpark Classic**.

This has become today the standard fixing system for most producers worldwide. No more screws on the surface.

2004 - Our profile evolved with a subtle modification. The **invisible profile** for decking was born and patented.

The understructure was not visible, loss of valuables was no longer a concern and our decks became safer and cleaner for the users. Our most spread technology for the time being, enjoyed all around the world.

2012 - Was the launching of our third patented innovation. **SpeedClip** was our first contribution to making installation

easier, screw-less, definitely faster and cost-efficient.

Innovation award 2016

Our best creation arrived in late **2014**.

The Magnet is the best system we have ever developed.

A system that works for virtually any kind of surface featuring multiple virtues:

versatility **total accessibility** **reusability**

EFFECT 1

INVISIBLE
PROFILE

STANDARD PROFILE WITH OPEN GAPS
VS EXTERPARK INVISIBLE PROFILE

-exterpark

Our Invisible patented profile provides several advantages

Better Look: no gaps and no visible understructure

Hygienic: no food or other objects can fall down

No loss of valuables: coins, rings or keys

Safer: nothing can get stuck such as high heels or fingers

EFFECT 2

ASSEMBLY
the magnet®

INSTALLATION BENEFITS

An advanced **mechanical locking** with superior grip which holds boards stronger than a screw but yet flexible to open up and close again if necessary

EASY No screws

FAST No predrilling

SILENT No tools

COST-EFFICIENT

EFFECT 3

ACCESSIBILITY
the magnet®

TOTAL ACCESS FOR DECKS AND WALLS

accessibility

maintenance friendly

easy substitution of boards

CONCERNED
FOR THE
PLANET

the magnet®

THINKING **GREEN**

enlarged service life
relocation possibilities

reusable

Commitment with the environment

We manufacture using sustainable sources such as FSC certified wood.

Furthermore Exterpark Magnet features certain characteristics that provide credits for the green LEED building certification.

THE MAGNET SYSTEM WORKS OVER 6 ESSENTIAL ELEMENTS:

A special **groove** at the bottom of each board to allocate magnet clips

Aluminum joists with a very specific and accurate geometry for the magnet clip to click inside

Spacers between boards to leave 4mm invisible expansion and drainage gap

Blocking units to keep all boards always in same place and prevent longitudinal movement

Levelling instruments such as **pedestals** and **wedges**

A COMPLETE SYSTEM

the magnet®

The **Magnet clip** is the corner stone of the system. The key is the strength with the right flexibility. Fully made of POM, a high performance engineering thermoplastic with excellent dimensional stability even at extreme conditions. Strong yet flexible, low friction coefficient and high abrasion resistance.

ALUMINUM JOISTS: A SOLID ROCK FOUNDATION

All scenarios - Building it forever

LOW HEIGHT

WALLS AND CEILINGS

SINGLE

DOUBLE

Details

Comprehensive system with complete solutions

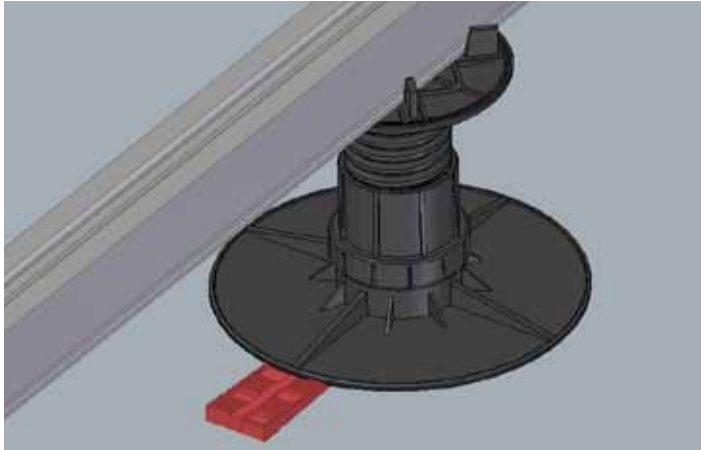

We have created the double click joint for the short-end connections, which is a must for the good performance of the product. There is even a 4mm spacing mark for the indicative recommended expansion gap essential for Exterpark Tech.

COMPREHENSIVE SYSTEM

Instruments

Levelling wedges and height adjustable pedestals.

Blocking spacer to prevent longitudinal misplacement of boards and still allow for the required expansion and contraction.

Pointed joist leg interlocks perfectly with wedges for a very easy and accurate levelling.

Using the magnet tool, any board can be opened up in less than 5 seconds

EXTERPARK TECH WPC RANGE
